Alpha Roofing and Sheet Metal is a full-service roofing and sheet metal contractor specializing in single-ply roof systems, metal roof and wall panels and shingles for residential and commercial properties.

As General Manager of Alpha Roofing and Sheet Metal, I invite you to experience the difference that Alpha Roofing and Sheet Metal can make on your projects. Prior to joining the company in 2006, my 24 years of industry roofing and sheet metal experience ranged from laborer to foreman to estimator to general manager. **This comprehensive experience, combined with that of our team of Alpha Roofing and Sheet Metal specialists, assures you of the highest quality service and support in the industry today.**

For more than two decades, Alpha Roofing and Sheet Metal has relied on our high level of discipline, commitment to service and resourcefulness to preserve our client list throughout MA, southern NH and northern CT and RI. Our highly experienced sheet metal installers work hand in hand with our shop fabrication team to fabricate all your architectural metal needs, including historic details, to ensure clean lines and a tight fit, so nominal adjustments are required during the installation of your architectural metal or historic red copper.

Alpha Roofing and Sheet Metal is now expanding into the new construction market to complement the work we earn through consultants, architects and property management companies.

Thomas Tivnan
